About this Manual

This manual is intended for service personnel who have completed sufficient training to undertake the maintenance and inspection of personal computers.

It is organized to allow you to look up basic information for servicing and/or upgrading components of the computer.

The following information is included:

Chapter 1, Introduction, provides general information about the location of system elements and their specifications.

Chapter 2, Disassembly, provides step-by-step instructions for disassembling parts and subsystems and how to upgrade elements of the system.

Appendix A, Part Lists

Appendix B, Schematic Diagrams

Appendix C, Clock Ratios

Appendix D, Jumper Settings

Preface

Related Documents

You may also need to consult the following manual for additional information:

User's Manual on CD

This describes the computer's features and the procedures for operating the computer and its ROM-based setup program. It also describes the installation and operation of the utility programs provided with the computer.

1: Introduction

Overview

This manual covers the information you need to service or upgrade the L295P/L297P LCD computer. Information about operating the computer (e.g. getting started, and the *Setup* utility) is in the *User's Manual*. Information about drivers (e.g. VGA & audio) is also found in *User's Manual*. That manual is shipped with the computer.

Operating systems (e.g. *DOS*, *Windows 9x*, *Windows NT 4.0*, *Windows 2000*, *Windows XP*, *OS/2 Warp*, *UNIX*, etc.) have their own manuals as do application software (e.g. word processing and database programs). If you have questions about those programs, you should consult those manuals.

The L295P/L297P LCD computer is designed to be upgradeable. See ***“Disassembly” on page 2 - 1*** for a detailed description of the upgrade procedures for each specific component. Please note the warning and safety information indicated by the “” symbol.

The balance of this chapter reviews the computer's technical specifications and features.

Model Differences

The differences between the model types are indicated in the table and pictures below.

Table 1 - 1
Model Specifications

Feature/Model	L295P(A/B/T) Series	L297P(B/D) Series
LCD Size	15" XGA	17" SXGA
CD Device Location	Left Side	Front
Dimensions	369mm (H) * 384mm (W) * 188mm (D)	395mm (H) * 418mm (W) * 179mm (D)
Weight	8.9 Kg	10.2 Kg
Designs Supported (Additional Colors Also supported)

2: Disassembly

Overview

This chapter provides step-by-step instructions for disassembling parts and subsystems. When it comes to reassembly, reverse the procedures (unless otherwise indicated).

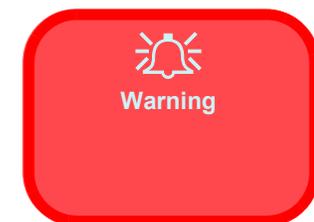

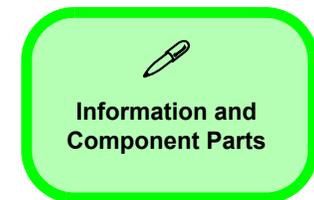

We suggest you completely review any procedure before you take the computer apart.

Procedures such as upgrading/replacing the RAM, CD device and hard disk are included in the User's Manual but are repeated here for your convenience.

To make the disassembly process easier each section may have a box in the page margin. Information contained under the figure # will give a synopsis of the sequence of procedures involved in the disassembly procedure. A box with a  lists the relevant parts you will have after the disassembly process is complete. **Note:** The parts listed will be for the disassembly procedure listed ONLY, and not any previous disassembly step(s) required. Refer to the part list for the previous disassembly procedure. The amount of screws you should be left with will be listed here also.

A box with a  will provide any possible helpful information. A box with a  contains warnings.

An example of these types of boxes are shown in the sidebar.

Disassembly

NOTE: All disassembly procedures assume that the system is turned **OFF**, and disconnected from any power supply, and that all peripheral cables are disconnected (including telephone lines and network cables).

Maintenance Tools

The following tools are recommended when working on the computer:

- M3 Philips-head screwdriver
- M2.5 Philips-head screwdriver (magnetized)
- M2 Philips-head screwdriver
- Small flat-head screwdriver
- Pair of needle-nose pliers
- Anti-static wrist-strap

Connections

Connections within the computer are one of four types:

Locking collar sockets for ribbon connectors	To release these connectors, use a small flat-head screwdriver to gently pry the locking collar away from its base. When replacing the connection, make sure the connector is oriented in the same way. The pin1 side is usually not indicated.
Pressure sockets for multi-wire connectors	To release this connector type, grasp it at its head and gently rock it from side to side as you pull it out. Do not pull on the wires themselves. When replacing the connection, do not try to force it. The socket only fits one way.
Pressure sockets for ribbon connectors	To release these connectors, use a small pair of needle-nose pliers to gently lift the connector away from its socket. When replacing the connection, make sure the connector is oriented in the same way. The pin1 side is usually not indicated.
Board-to-board or multi-pin sockets	To separate the boards, gently rock them from side to side as you pull them apart. If the connection is very tight, use a small flat-head screwdriver - use just enough force to start.

Maintenance Precautions

The following precautions are a reminder. To avoid personal injury or damage to the computer while performing a removal and/or replacement job, take the following precautions:

1. **Don't drop it.** Perform your repairs and/or upgrades on a stable surface. If the computer falls, the case and other components could be damaged.
2. **Don't overheat it.** Note the proximity of any heating elements. Keep the computer out of direct sunlight.
3. **Avoid interference.** Note the proximity of any high capacity transformers, electric motors, and other strong magnetic fields. These can hinder proper performance and damage components and/or data. You should also monitor the position of magnetized tools (i.e. screwdrivers).
4. **Keep it dry.** This is an electrical appliance. If water or any other liquid gets into it, the computer could be badly damaged.
5. **Be careful with power.** Avoid accidental shocks, discharges or explosions.
 - Before removing or servicing any part from the computer, turn the computer off and detach any power supplies.
 - When you want to unplug the power cord or any cable/wire, be sure to disconnect it by the plug head. Do not pull on the wire.
6. **Peripherals** – Turn off and detach any peripherals.
7. **Beware of static discharge.** ICs, such as the CPU and main support chips, are vulnerable to static electricity. Before handling any part in the computer, discharge any static electricity inside the computer. When handling a printed circuit board, do not use gloves or other materials which allow static electricity buildup. We suggest that you use an anti-static wrist strap instead.
8. **Beware of corrosion.** As you perform your job, avoid touching any connector leads. Even the cleanest hands produce oils which can attract corrosive elements.
9. **Keep your work environment clean.** Tobacco smoke, dust or other air-born particulate matter is often attracted to charged surfaces, reducing performance.
10. **Keep track of the components.** When removing or replacing any part, be careful not to leave small parts, such as screws, loose inside the computer.

Cleaning

Do not apply cleaner directly to the computer, use a soft clean cloth.

Do not use volatile (petroleum distillates) or abrasive cleaners on any part of the computer.

Power Safety Warning

Before you undertake any upgrade procedures, make sure that you have turned off the power, and disconnected all peripherals and cables (including telephone lines). It is advisable to also remove your battery in order to prevent accidentally turning the machine on.

Disassembly Steps

The following lists the disassembly steps, and on which page to find the related information. **PLEASE PERFORM THE DISASSEMBLY STEPS IN THE ORDER INDICATED.**

To remove the hard disk drive assembly:

1. Remove the hard disk drive assembly [page 2 - 5](#)

To remove the LCD back cover:

1. Remove the LCD back cover [page 2 - 6](#)

To remove the system memory:

1. Remove the LCD back cover [page 2 - 6](#)
2. Remove the system memory [page 2 - 7](#)

To remove the CPU:

1. Remove the LCD back cover [page 2 - 6](#)
2. Remove the CPU [page 2 - 8](#)

To remove the I/O Bracket:

1. Remove the LCD back cover [page 2 - 6](#)
2. Remove the I/O bracket [page 2 - 10](#)

To remove the modem:

1. Remove the LCD back cover [page 2 - 6](#)
2. Remove the I/O bracket [page 2 - 10](#)
3. Remove the modem [page 2 - 11](#)

To remove the floppy disk drive assembly:

1. Remove the LCD back cover [page 2 - 6](#)
2. Remove the floppy disk drive assembly [page 2 - 12](#)

To remove the Mini PCI I/F module:

1. Remove the LCD back cover [page 2 - 6](#)
2. Remove the Mini PCI I/F module [page 2 - 13](#)

To remove the L295P series CD/DVD Device:

1. Remove the LCD back cover [page 2 - 6](#)
2. Remove the CD/DVD device [page 2 - 14](#)

To remove the L297P series CD/DVD Device:

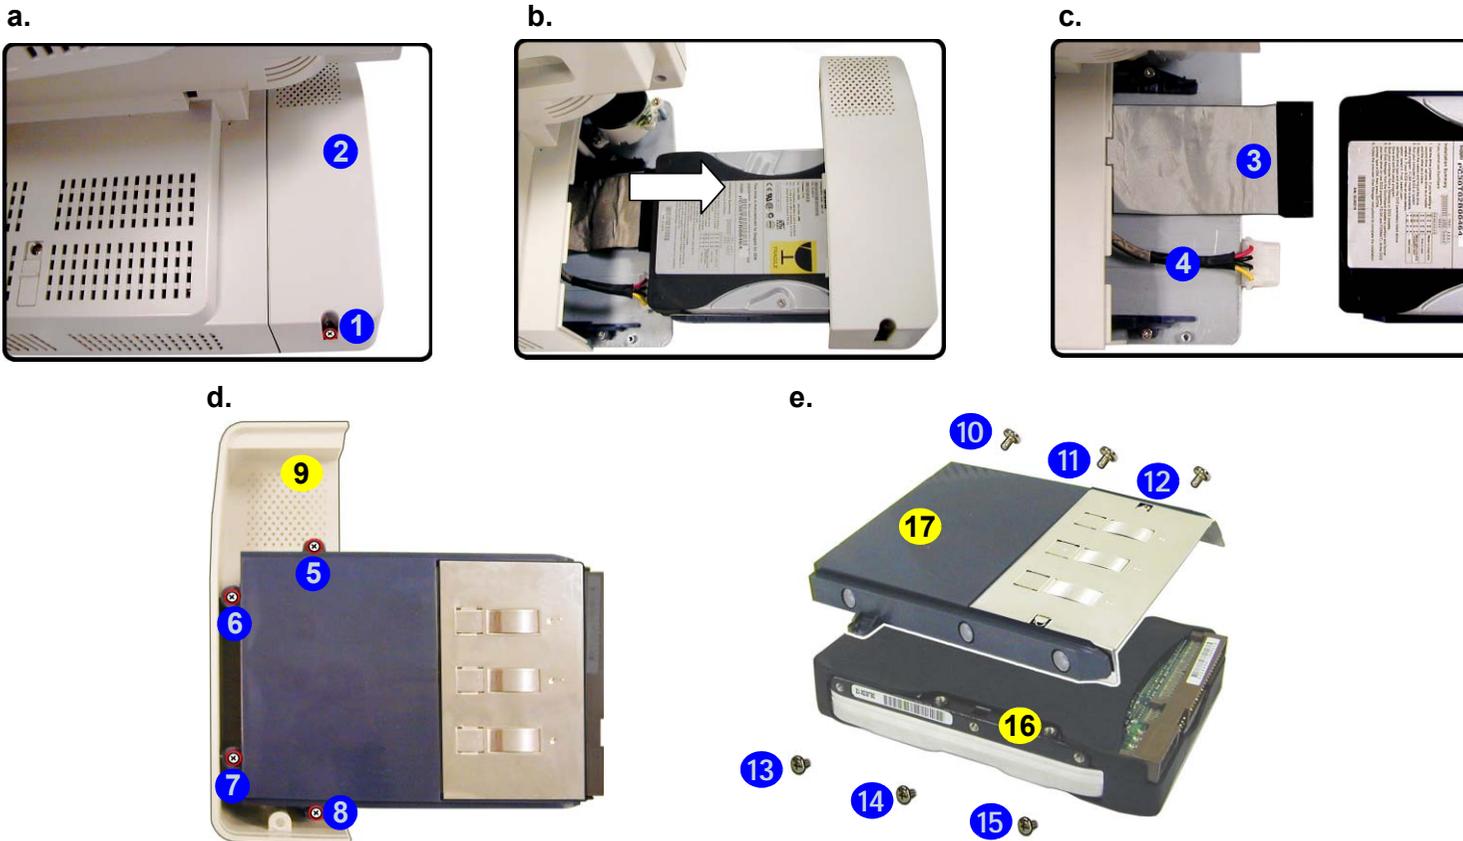

1. Remove the LCD back cover [page 2 - 6](#)
2. Remove the CD/DVD device [page 2 - 15](#)

Removing the Hard Disk Drive Assembly

1. Turn **OFF** the computer and turn it around so that you may comfortably access the left side.
2. Remove screw **1** from the HDD Bay **2**.
3. Carefully pull the HDD assembly out from the bay and disconnect the IDE cable **3**, and power cable **4**.
4. Turn the assembly over and remove screws **(5 - 8)** holding the assembly to the bay cover **9**.
5. Remove screws **10 - 15** and separate the hard disk **16** and case **17**.
6. Insert the new hard disk, and reverse the removal procedures to install the new hard disk.

Figure 2 - 1
Hard Disk Removal Sequence

- a. Remove the screw from the HDD Bay.
- b. Slide the HDD assembly in the direction of the arrow.
- c. Disconnect the IDE and power cables.
- d. Remove the screws from the assembly.
- e. Remove the screws and separate the HDD from the case.

9. HDD Bay Cover
16. HDD
17. HDD case

- 11 Screws

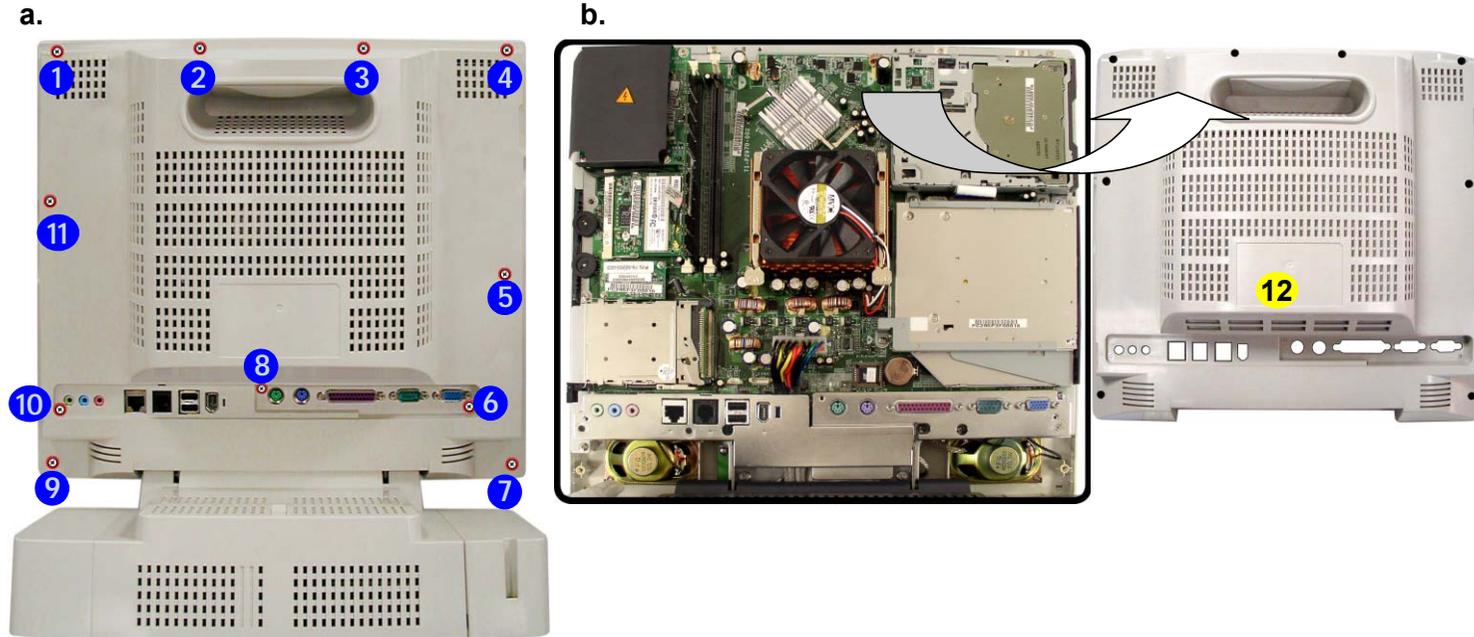

Disassembly

Figure 2 - 2
**LCD Back Cover
Removal
Sequence**

- a. Remove the screws from the LCD back cover.
- b. Lift the cover out and set it aside.

Removing the LCD Back Cover

1. Turn **OFF** the computer and place it with its LCD display facing down on a clean, dry, level surface.
2. Remove screws **1** - **11** from the LCD back cover and slide it up towards the top of the computer.
3. Carefully remove the LCD back cover **12** from the main unit and set it aside.

12. LCD back cover

- 11 Screws

Removing the System Memory

1. Remove the LCD back cover ([page 2 - 6](#)).
2. The memory sockets will be visible at point **1** on the mainboard.
3. For each module you want to replace, gently pull the latches **2** and **3** toward the sides of the socket to release the module.
4. The module **4** will pop-up, and you can remove it.
5. Insert a new module holding it at about a 30° angle and fit the connectors firmly into the memory slot.

Figure 2 - 3
Memory Removal Sequence

- a. Locate the memory sockets.
- b. Pull the latch(es) on the memory sockets to release the module(s).
- c. When the module pops up, lift it out.

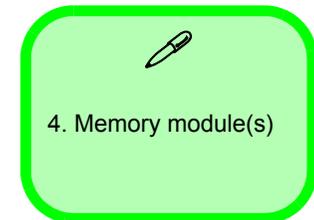

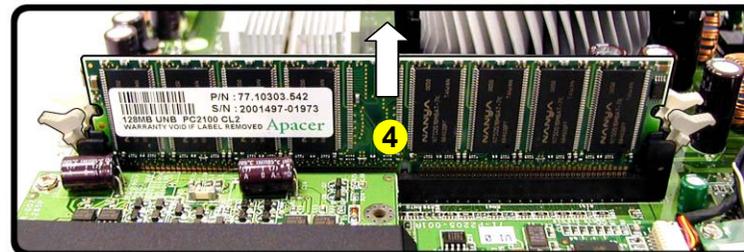

a.

b.

c.

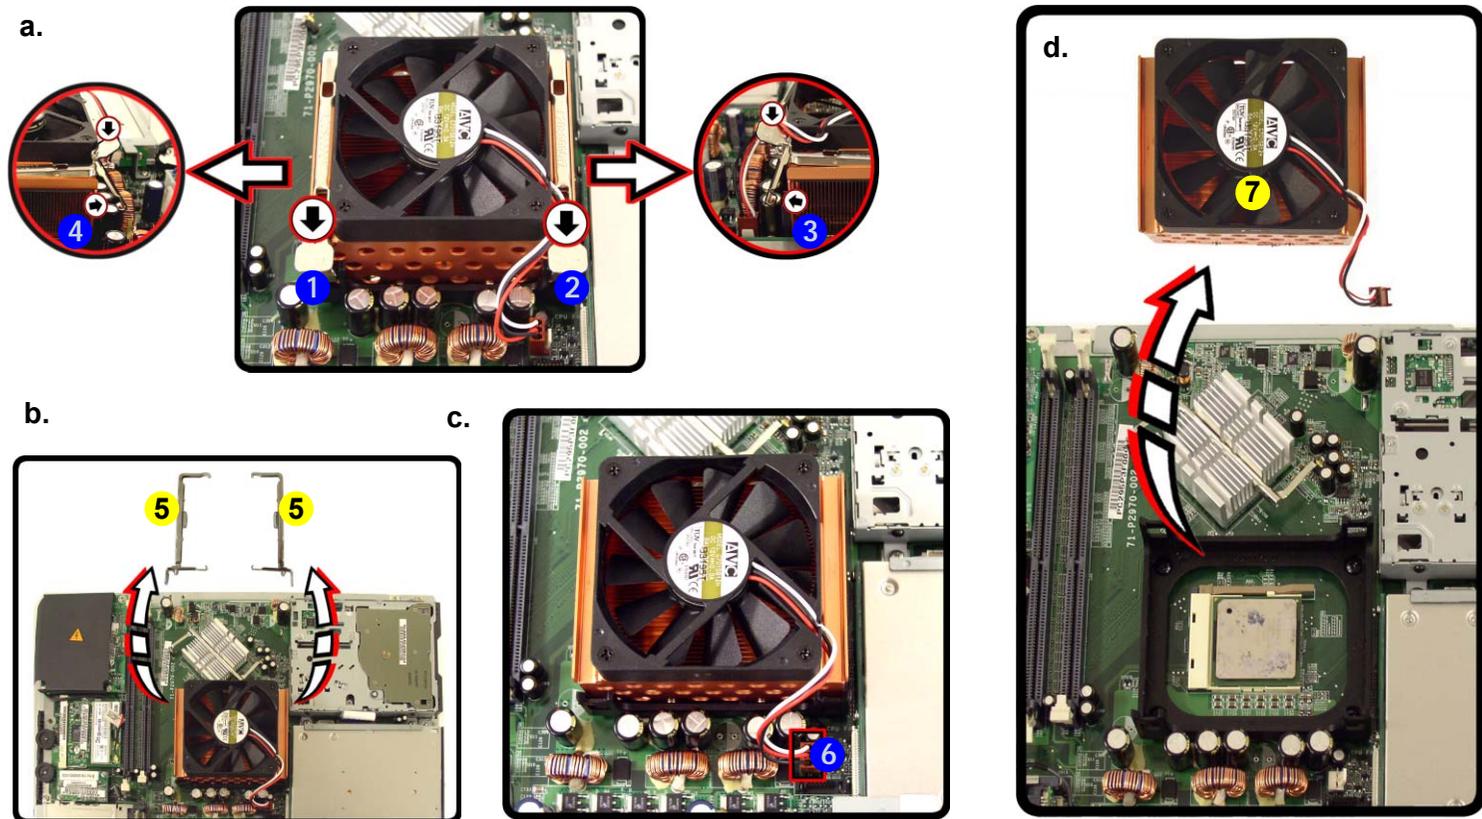

Disassembly

Figure 2 - 4
CPU Removal
Sequence

- Release the latches from the top of the CPU heat sink and fan unit.
- Remove the latches.
- Release the power cable.
- Lift the heat sink & fan unit out.

Removing the CPU

- Remove the LCD back cover ([page 2 - 6](#)).
- Press down and hold each of the latches **1** & **2** (on the top of the CPU heat sink and fan unit) in turn.
- With the latch held down you will be able to release the brackets (at points **3** & **4**), and then ease the brackets **5** off the fan unit.
- Release the power cable **6** from the board and lift out the CPU heat sink fan unit **7**.

Caution

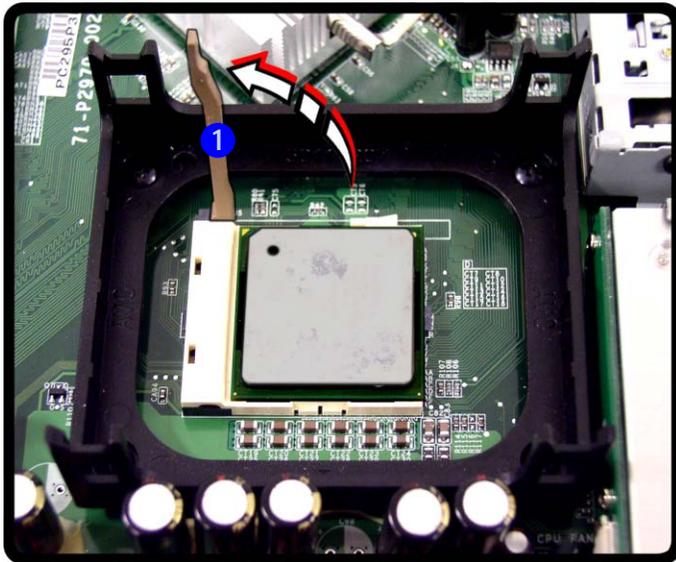

The heat sink, and CPU area in general, contains parts which are subject to high temperatures - Please allow the area time to cool before removing these parts.

- Brackets
- Heat Sink & Fan

5. Move the latch **1** fully in the direction indicated in to unlock the CPU.
6. Carefully (it may be hot) lift the CPU **3** up out of the socket.
7. When re-inserting the CPU pay careful attention to the pin alignment, it will fit only one way (don't force it!).

a.

b.

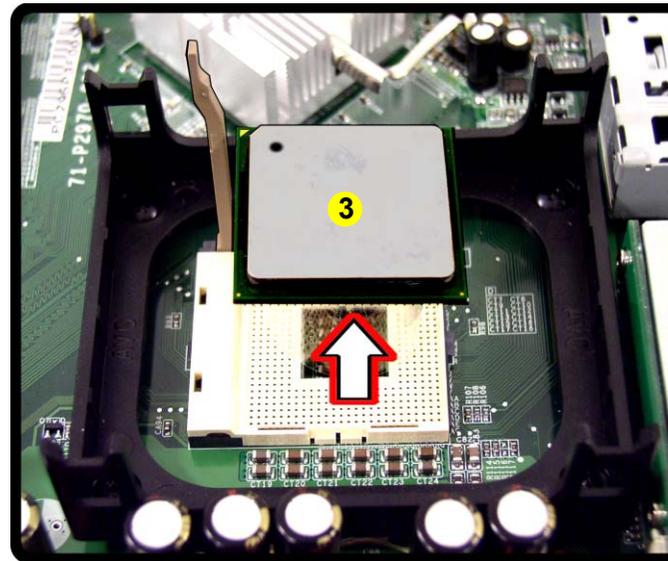

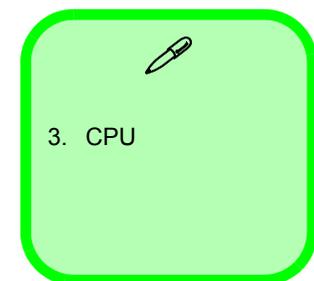

Figure 2 - 5
CPU Removal
Sequence (cont'd)

- a. Lift the latch to unlock the CPU.
- b. Lift the CPU out of the socket.

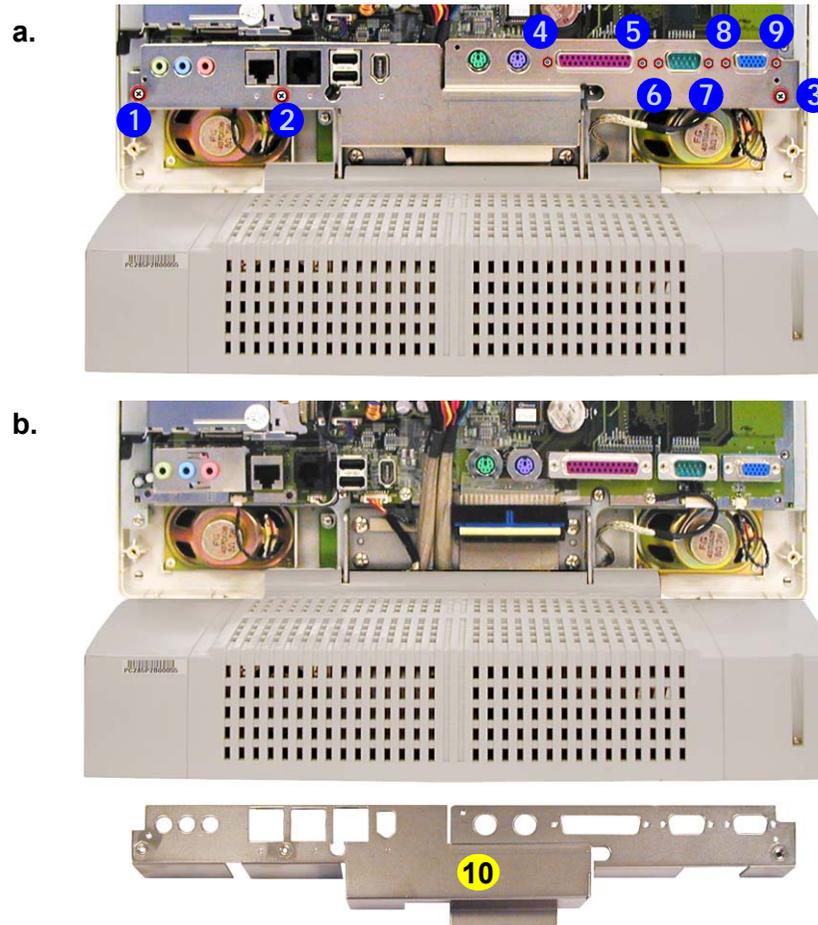

Disassembly

Figure 2 - 6 I/O Bracket Removal Sequence

- a. Remove the screws from the I/O bracket.
- b. Lift the I/O bracket up off the mainboard.

Removing the I/O Bracket

1. Remove the LCD back cover ([page 2 - 6](#)).
2. Remove the standard screws **1** - **3**, and use long-nosed pliers or a nutdriver to remove the hex socket connector type screws **4** - **9**.
3. Carefully ease the I/O bracket **10** off the mainboard.

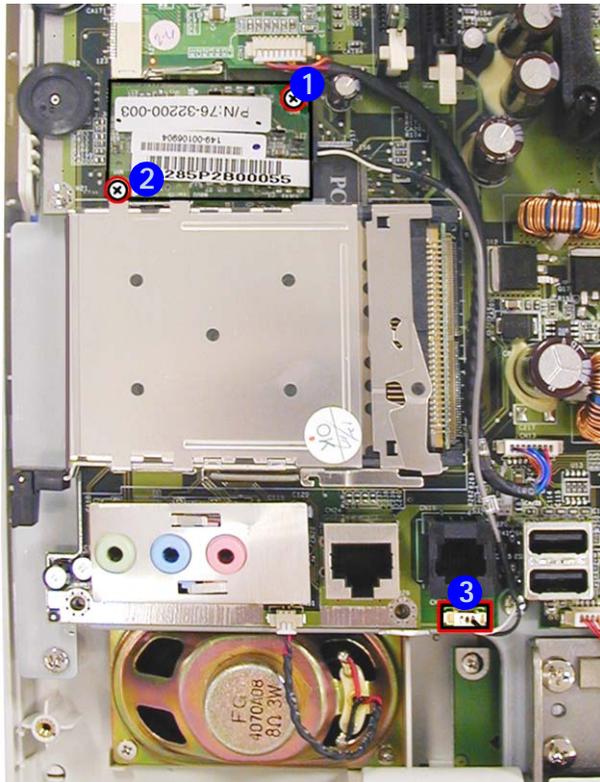

10. I/O bracket

9 Screws

Removing the Modem

1. Remove the LCD back cover ([page 2 - 6](#)) and I/O bracket ([page 2 - 10](#)).
2. Remove screws **1** and **2** from the modem module and disconnect the modem cable at point **3**.
3. Disconnect the modem module **4** from the connector socket **5**, and lift it and the modem and cable **6** off the mainboard.

a.

b.

Figure 2 - 7
Modem Removal Sequence

- a. Remove the screws from the modem unit, and disconnect the cable.
- b. Lift the modem and cable off the board.

4. Modem module
6. Modem cable

- 2 Screws

Disassembly

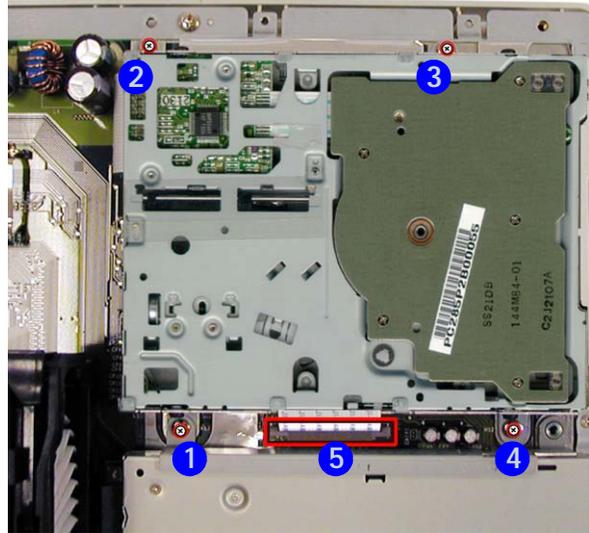

Figure 2 - 8 Floppy Disk Drive Assembly Removal Sequence

- a. Remove the screws from the FDD assembly and disconnect the FDD ribbon cable.
- b. Lift the FDD assembly off the board.

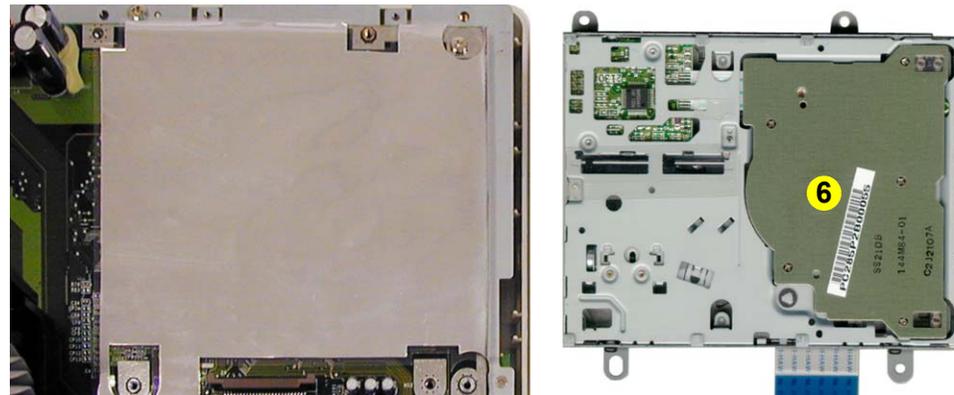

Removing the Floppy Disk Drive Assembly

1. Remove the LCD back cover ([page 2 - 6](#)).
2. Remove screws ① - ④ from the floppy disk drive assembly.
3. Carefully disconnect the floppy disk drive ribbon cable at point ⑤.
4. Lift the floppy disk drive assembly ⑥ off the mainboard.

a.

b.

6. FDD Assembly

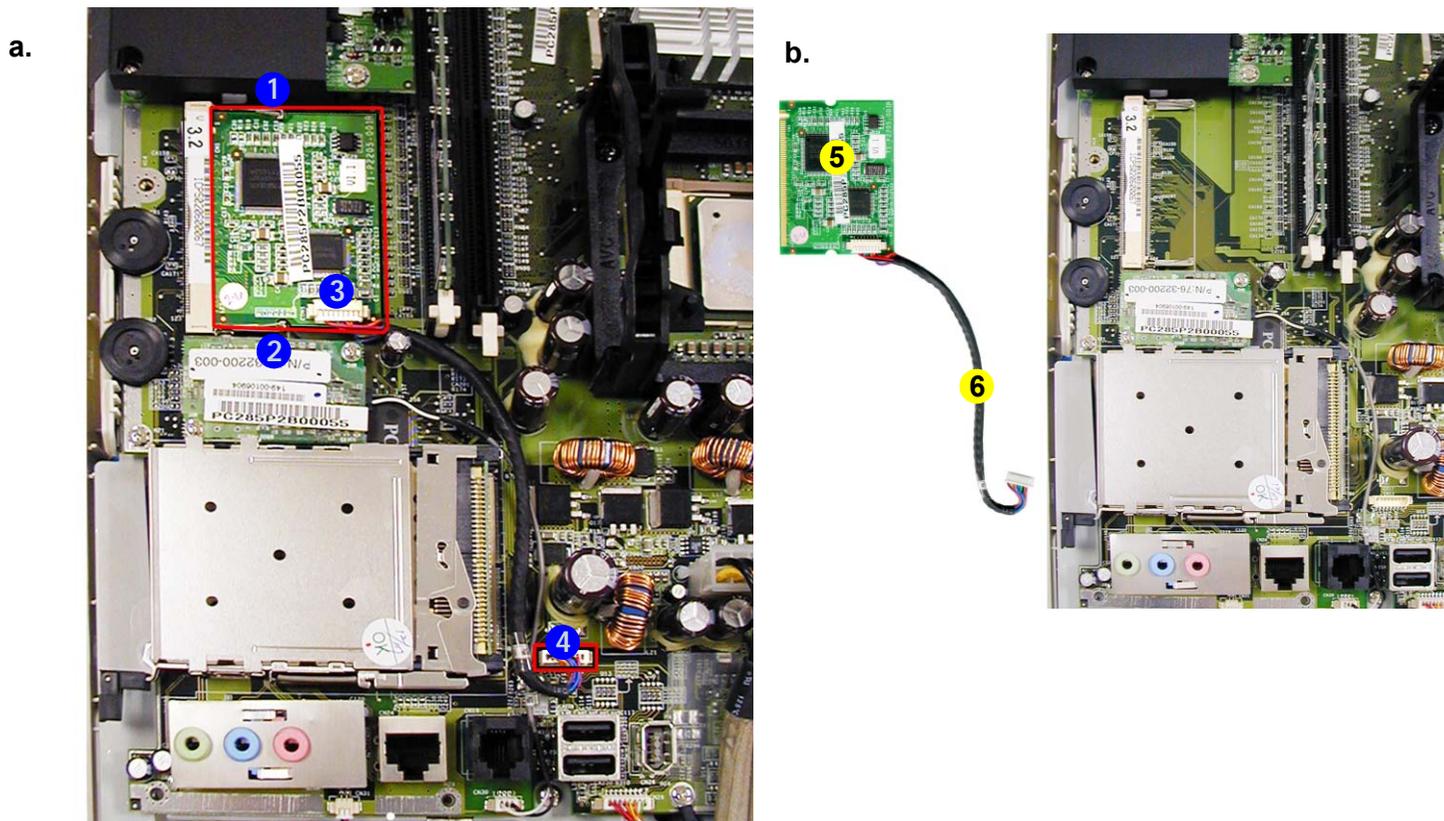

- 4 Screws

Removing the Mini PCI I/F Module

1. Remove the LCD back cover ([page 2 - 6](#)).
2. Release the pins at points **1** & **2** and carefully lift up the Mini PCI I/F module.
3. If the module is the **Mini PCI I/F 1394** (pictured):
Disconnect the cable at point **3** (and **4** if necessary), then lift Mini PCI I/F module **5** and cable **6** off the mainboard.
4. If the module is the **Mini PCI WLAN** (not pictured):
Disconnect the antenna cables at the **RF Main** and **RF Aux** points on the module, then lift Mini PCI I/F module off the mainboard.

Figure 2 - 9
Mini PCI I/F Module Removal Sequence

- a. Release the pins and carefully lift the Mini PCI I/F module up.
- b. Disconnect the cable(s) and lift the Mini PCI I/F module up and out from the mainboard.

Removal
Sequence

Removing the CD Device Assembly (L295P Series)

1. Remove the LCD back cover ([page 2 - 6](#)).
2. Remove screws **1** - **3**, and disconnect cable **4**, from the CD device.
3. Remove the CD Device **5**.

- a. Remove the screws and disconnect the cable.
- b. Remove the CD Device.

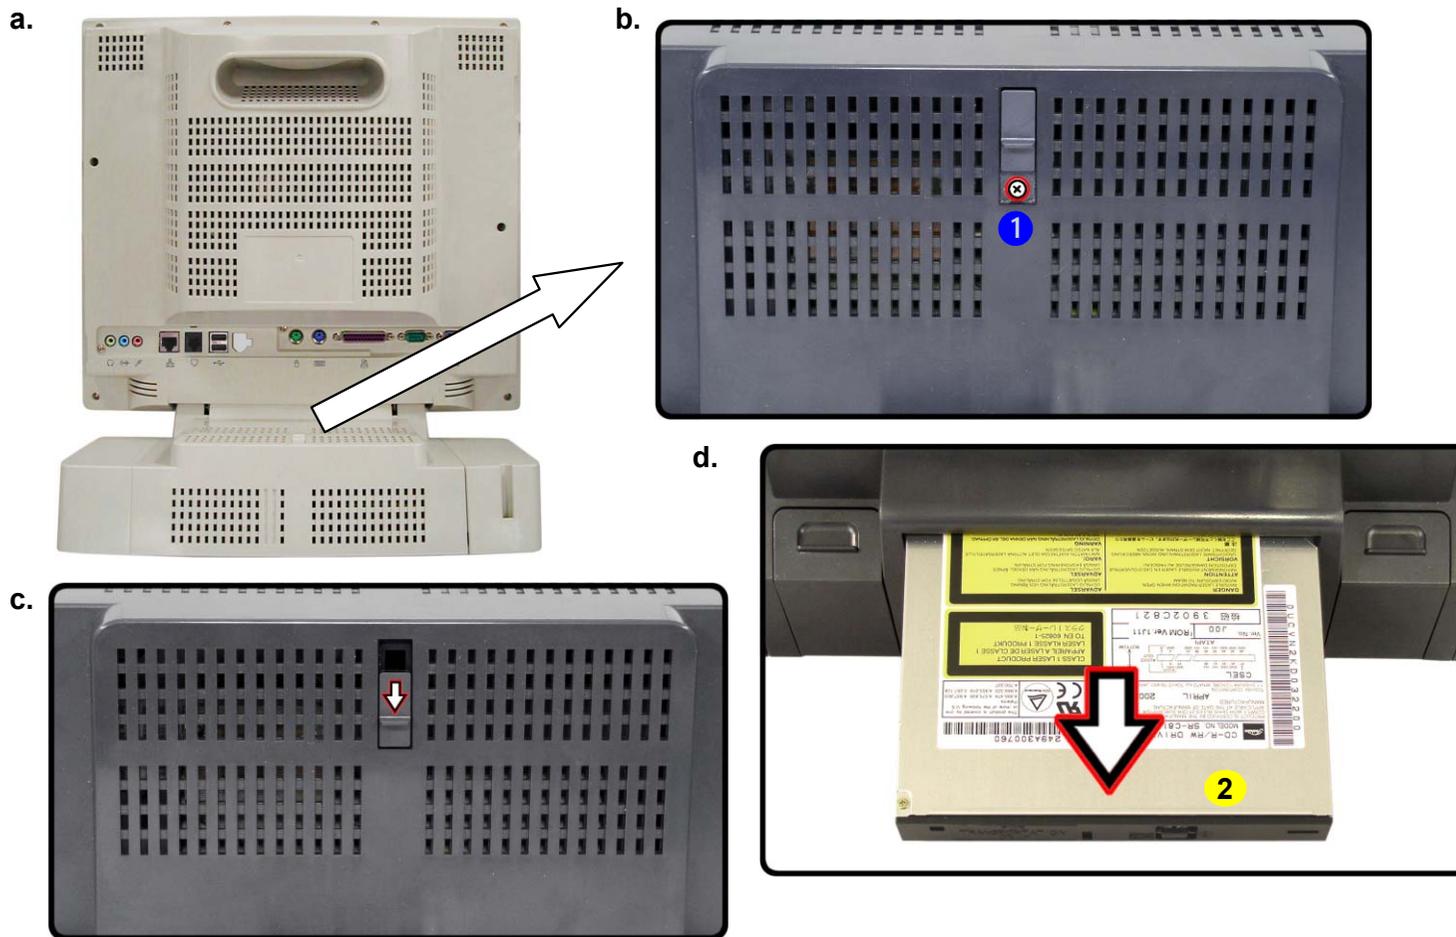

- 5. CD Device
- 3 Screws

Removing the CD Device Assembly (L297P Series)

1. Turn the computer **OFF** and turn it around so that you may comfortably access the rear.
2. Locate the CD-ROM eject switch and remove screw **1**.
3. Push the CD-ROM eject switch to slide the CD device assembly out of the bay.
4. Remove the CD Device **2**.

Figure 2 - 11
L297P CD Device
Assembly
Removal
Sequence

- a. Locate the CD-ROM eject switch at the rear of the computer.
- b. Remove the screw.
- c. Push the switch to slide the CD Device Assembly out of the bay.
- d. Remove the CD Device.

✎

2. CD Device

- 1 Screw

Appendix A: Part Lists

This appendix breaks down the computer's construction into a series of illustrations. The component part numbers are indicated in the tables opposite the drawings.

Note: This section indicates the *manufacturer's* part numbers. Your organization may use a different system, so be sure to cross-check any relevant documentation.

Note: Some assemblies may have parts in common (especially screws). However, the part lists DO NOT indicate the total number of duplicated parts used.

Note: Be sure to check any update notices. The parts shown in these illustrations are appropriate for the system at the time of publication. Over the product life, some parts may be improved or re-configured, resulting in *new* part numbers.

Part List Illustration Location

The following table indicates where to find the appropriate part list illustration.

Appendix C: Clock Ratios

This appendix is about the system's clock ratios.

The table below lists the supported memory clock ratios. AGP, CSA and HI run at 66 MHz common clock and are asynchronous to the chipset core. There is no required skew or ratio between FSB/Chipset and 66MHz system clocks.

System Memory Clock Ratios

Host Clock	DRAM Clock	Ratios	DRAM Data Rate	DRAM Type	Peak Bandwidth
100 MHz	133 MHz	3/4	266 MT/s	DDR-DRAM	2.1 GB/s
133 MHz	133 MHz	1/1	266 MT/s	DDR-DRAM	2.1 GB/s
200 MHz	133 MHz	3/2	266 MT/s	DDR-DRAM	2.1 GB/s
133 MHz	166 MHz	4/5	333 MT/s	DDR-DRAM	2.7 GB/s
200 MHz	160 MHz	5/4	320 MT/s	DDR-DRAM	2.6 GB/s
200 MHz	200 MHz	1/1	400 MT/s	DDR-DRAM	3.2 GB/s

Table C - 1

 Clock Ratios**

Appendix D: Jumper Settings

This appendix is about the system's and jumper settings. The following figure shows the location of the Jumper the system uses. You can access them after you remove the LCD back cover. Be sure to turn OFF the system before you perform any part removal procedure.

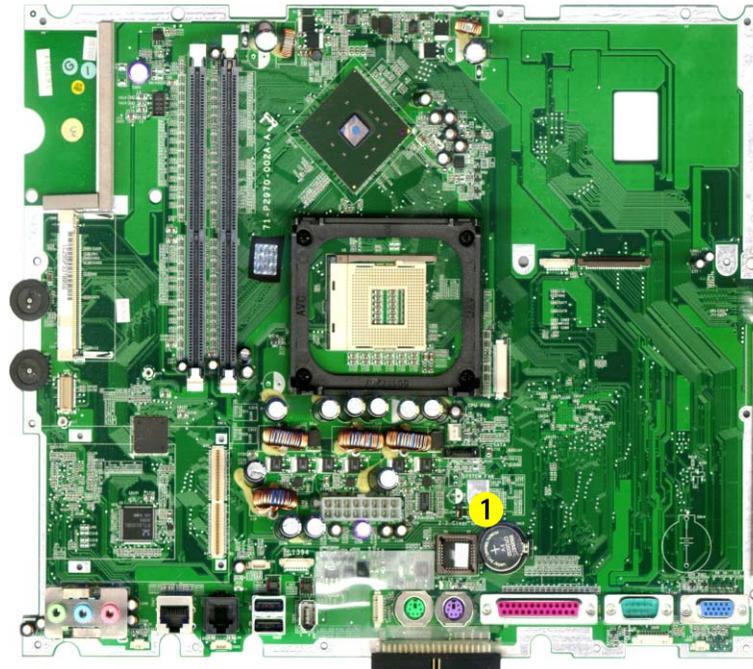

Figure D - 1
Mainboard Jumper Location

1. J5

Clean CMOS Jumper Settings (Jumper J5)

Type	Pins 1 & 2	Pins 2 & 3
Normal (default)	ON	
Clean CMOS		ON
