# ADDITIONAL JPMPER SETTINGS FOR LGM-ITX5

This mainboard has been updated to support the AMD K6-2 processors. Please refer to the following jumper settings when you are installing the AMD K6-2 processors:

JP 5 ~ JP 10          JP 13

| AMD K6-2/266 | AMD K6-2/300 | AMD K6-2/333 |
| --- | --- | --- |

*NOTE*: JP13 is designed to support the 2.2V CPU Core voltage, When short connected, the CPU Vcore will be 2.2V and it will allow you to install the AMD K6-2 processors. If you are not using the AMD K6-2 processors, please leave JP13 open and refer to the manual for jumper settings.
