

Addendum

P5BV3+

Rev. CE0+

Processors

- New Supported Processors

The rev. CE0 system board now supports WinChip2-233, K6-2/450 and K6-III/400 processors.

- Correction

The external system bus clock and frequency ratio of WinChip2-266 and WinChip2-300 processors are incorrect, therefore the DIP switch settings for these processors has been changed.

Please refer to the table below for the updated settings.

Processor	SWI: 1-6
K6-2/450 - 100MHz - 4.5x	
K6-III/400 - 100MHz - 4x	
WinChip2-233 - 66MHz - 3.5x	
WinChip2-266 - 100MHz - 2.33x	
WinChip2-300 - 100MHz - 2.5x
